2

Chums commenced appearing in Short Bay about July 17, numbering approximately 700 and by July 20 there were nearly 3000 at the mouth of the stream. Beginning on July 21 I estimated the number of salmon going up stream together with the number of salmon caught, which is shown below:

July 21	3000	Chums	escaped up stream					
22	2000	"	"					
23	1500	"	"					
24	800	"	"					
25	1200	"	"					
26	1500	"	"					
27	2000	"	"					
28	1200	"	"	(6 Hauls made, catching 1350 chums.)				
29	1800	"	"					
30	1500	"	"					
31	1000	"	"	Streams getting lower.				
Aug. 1	600	"	"					
2	500	"	"					
3	700	"	"	300 Humps escaped				
5	500	"	"	1500	"	"	2 Hauls	Chums 150 Humps 850
6	1000	"	"	2000	"	"		
7	700	"	"	1500	"	"		
8	1000	"	"	2000	"	"		
9	1000	"	"	2500	"	"		
10	1200	"	"	2000	"	"		
11	1000	"	"	2500	"	"		
12	1000	"	"	3000	"	"		
13	600	"	"	6000	"	"	7 Hauls	2400 hump
14				5000	"	"	2 "	300 "
15				7000	"	"	3 "	3000 "
16	300	"	"	7000	"	"		
17	400	"	"	10000	"	"		
18	200	"	"	6000	"	"	Average flow of water	
19				6000	"	"	5 Hauls-300 Chums	3000 Hump
20	100	"	"	4000	"	"	1 "	50 "
21				5000	"	"		
22				(Water so muddy could see no salmon - evidently a land slide.)				
23				7000 Humps escaped (Water very high).				
24				13500	"	"	"	"
25				1000	"	"	"	"

Practically no salmon entered Short Bay after August 24.

The fishing was done from 100 to 500 yards from the dead line, but throughout the season the salmon did not, apparently, drop below the dead line at low tide.

Season of 1924.
